## Heroes Of Pymoli Data Analysis

- Of the 1163 active players, the vast majority are male (84%). There also exists, a smaller, but notable proportion of female players (14%).
- Our peak age demographic falls between 20-24 (44.8%) with secondary groups falling between 15-19 (18.60%) and 25-29 (13.4%).

## Note

- Instructions have been included for each segment. You do not have to follow them exactly, but they are included to help you think through the steps.

In [1]:

```
# Dependencies and Setup
import pandas as pd
import numpy as np

# File to Load (Remember to Change These)
file_to_load = "Resources/purchase_data.csv"

# Read Purchasing File and store into Pandas data frame
purchase_data = pd.read_csv(file_to_load)
```

## Player Count

- Display the total number of players

In [2]:

Out [2]:

|   | Total Players |
|---|---------------|
| 0 | 576           |

## Purchasing Analysis (Total)

- Run basic calculations to obtain number of unique items, average price, etc.
- Create a summary data frame to hold the results
- Optional: give the displayed data cleaner formatting
- Display the summary data frame

In [3]:

Out [3]:

|   | Number of Unique Items | Average Price | Number of Purchases | Total Revenue |
|---|------------------------|---------------|---------------------|---------------|
| 0 | 183                    | \$3.05        | 780                 | \$2,379.77    |

## Gender Demographics

- Percentage and Count of Male Players
- Percentage and Count of Female Players
- Percentage and Count of Other / Non-Disclosed

In [4]:

Out [4]:

|                       | Total Count | Percentage of Players |
|-----------------------|-------------|-----------------------|
| Male                  | 484         | 84.03                 |
| Female                | 81          | 14.06                 |
| Other / Non-Disclosed | 11          | 1.91                  |

## Purchasing Analysis (Gender)

- Run basic calculations to obtain purchase count, avg. purchase price, avg. purchase total per person etc. by gender
- Create a summary data frame to hold the results
- Optional: give the displayed data cleaner formatting
- Display the summary data frame

In [5]:

Out [5]:

|                       | Purchase Count | Average Purchase Price | Total Purchase Value | Avg Total Purchase per Person |
|-----------------------|----------------|------------------------|----------------------|-------------------------------|
| Gender                |                |                        |                      |                               |
| Female                | 113            | \$3.20                 | \$361.94             | \$4.47                        |
| Male                  | 652            | \$3.02                 | \$1,967.64           | \$4.07                        |
| Other / Non-Disclosed | 15             | \$3.35                 | \$50.19              | \$4.56                        |

## Age Demographics

- Establish bins for ages
- Categorize the existing players using the age bins. Hint: use pd.cut()
- Calculate the numbers and percentages by age group
- Create a summary data frame to hold the results
- Optional: round the percentage column to two decimal points
- Display Age Demographics Table

In [6]:

Out [6]:

|       | Total Count | Percentage of Players |
|-------|-------------|-----------------------|
| <10   | 17          | 2.95                  |
| 10-14 | 22          | 3.82                  |
| 15-19 | 107         | 18.58                 |

|       | Total Count | Percentage of Players |
|-------|-------------|-----------------------|
| 20-24 | 258         | 44.79                 |
| 25-29 | 77          | 13.37                 |
| 30-34 | 52          | 9.03                  |
| 35-39 | 31          | 5.38                  |
| 40+   | 12          | 2.08                  |

## Purchasing Analysis (Age)

- Bin the purchase\_data data frame by age
- Run basic calculations to obtain purchase count, avg. purchase price, avg. purchase total per person etc. in the table below
- Create a summary data frame to hold the results
- Optional: give the displayed data cleaner formatting
- Display the summary data frame

In [7]:

Out [7]:

|       | Purchase Count | Average Purchase Price | Total Purchase Value | Avg Total Purchase per Person |
|-------|----------------|------------------------|----------------------|-------------------------------|
| 10-14 | 28             | \$2.96                 | \$82.78              | \$3.76                        |
| 15-19 | 136            | \$3.04                 | \$412.89             | \$3.86                        |
| 20-24 | 365            | \$3.05                 | \$1,114.06           | \$4.32                        |
| 25-29 | 101            | \$2.90                 | \$293.00             | \$3.81                        |
| 30-34 | 73             | \$2.93                 | \$214.00             | \$4.12                        |
| 35-39 | 41             | \$3.60                 | \$147.67             | \$4.76                        |
| 40+   | 13             | \$2.94                 | \$38.24              | \$3.19                        |
| <10   | 23             | \$3.35                 | \$77.13              | \$4.54                        |

## Top Spenders

- Run basic calculations to obtain the results in the table below
- Create a summary data frame to hold the results
- Sort the total purchase value column in descending order
- Optional: give the displayed data cleaner formatting
- Display a preview of the summary data frame

In [8]:

Out [8]:

|             | Purchase Count | Average Purchase Price | Total Purchase Value |
|-------------|----------------|------------------------|----------------------|
| SN          |                |                        |                      |
| Lisosia93   | 5              | \$3.79                 | \$18.96              |
| Idastidru52 | 4              | \$3.86                 | \$15.45              |

|             | Purchase Count | Average Purchase Price | Total Purchase Value |
|-------------|----------------|------------------------|----------------------|
| SN          |                |                        |                      |
| Chamjask73  | 3              | \$4.61                 | \$13.83              |
| Iral74      | 4              | \$3.40                 | \$13.62              |
| Iskadarya95 | 3              | \$4.37                 | \$13.10              |

### Most Popular Items

- Retrieve the Item ID, Item Name, and Item Price columns
- Group by Item ID and Item Name. Perform calculations to obtain purchase count, item price, and total purchase value
- Create a summary data frame to hold the results
- Sort the purchase count column in descending order
- Optional: give the displayed data cleaner formatting
- Display a preview of the summary data frame

In [9]:

Out [9]:

|         |  | Purchase Count | Item Price | Total Purchase Value |
|---------|--|----------------|------------|----------------------|
| Item ID | Item Name                                    |                |            |                      |
| 178     | Oathbreaker, Last Hope of the Breaking Storm | 12             | \$4.23     | \$50.76              |
| 145     | Fiery Glass Crusader                         | 9              | \$4.58     | \$41.22              |
| 108     | Extraction, Quickblade Of Trembling Hands    | 9              | \$3.53     | \$31.77              |
| 82      | Nirvana                                      | 9              | \$4.90     | \$44.10              |
| 19      | Pursuit, Cudgel of Necromancy                | 8              | \$1.02     | \$8.16               |

### Most Profitable Items

- Sort the above table by total purchase value in descending order
- Optional: give the displayed data cleaner formatting
- Display a preview of the data frame

In [10]:

Out [10]:

|         |  | Purchase Count | Item Price | Total Purchase Value |
|---------|--|----------------|------------|----------------------|
| Item ID | Item Name                                    |                |            |                      |
| 178     | Oathbreaker, Last Hope of the Breaking Storm | 12             | \$4.23     | \$50.76              |
| 82      | Nirvana                                      | 9              | \$4.90     | \$44.10              |
| 145     | Fiery Glass Crusader                         | 9              | \$4.58     | \$41.22              |
| 92      | Final Critic                                 | 8              | \$4.88     | \$39.04              |
| 103     | Singed Scalpel                               | 8              | \$4.35     | \$34.80              |
